EDUCATION

University of Guelph

Bachelor of Computer Science, GPA: 3.9/4.0

2023 – Present

Guelph, Canada

EXPERIENCE

Chartwell Retirement Residences

Innovation & Technology Enablement, FASTtech Co-op

05/2026 – Present

Mississauga, Canada

- Supporting development and QA testing for a resident-facing platform for meals, events, activities, announcements, and updates.
- Testing app workflows, documenting defects, and validating usability improvements across resident and admin features.
- Using AI-assisted development and prototyping tools to support feature refinement, workflow testing, and UX improvements.
- Assisting residents with app onboarding, feature walkthroughs, troubleshooting, and feedback collection during site visits.

Sonova

Software Quality Assurance Analyst Co-op

09/2025 – 12/2025

Kitchener, Canada

- Performed hands-on QA testing for hearing aids and companion mobile applications across iOS and Android.
- Executed functional, regression, and end-to-end test cases while tracking QA work and documentation in Jira.
- Logged reproducible defects with clear steps, screenshots, screen recordings, and device/app logs for debugging.
- Collaborated with developers and QA team members to communicate issues, verify fixes, and support releases.

Chartwell Retirement Residences

Software Developer & IT Services Co-op

05/2025 – 08/2025

Mississauga, Canada

- Built a Python automation script using API lookups to auto-populate internal shipping forms and reduce manual entry.
- Automated repetitive data workflows and validated records across a high-volume internal database.
- Supported IT operations by provisioning, reimaging, and deploying Windows laptops across business locations.

PROJECTS

AI-Powered Email Automation Workflow (Co-op)

2025

- Built a desktop email automation workflow using Python, REST APIs, and Azure-based AI services to process and classify high-volume mailbox data.
- Integrated ChatGPT/Azure OpenAI API calls to categorize emails such as invoices, statements, spam, and out-of-office messages using prompt-driven classification logic.
- Parsed mailbox content, structured extracted data, and routed outputs into defined categories to support downstream processing and business workflows.

Scalable Multi-User Backend Platform

2026

- Engineered a scalable backend platform for authenticated multi-user access using Spring Boot, Node.js, SQL, and NoSQL databases.
- Designed RESTful APIs with CRUD operations, filtering, pagination, validation, and structured error handling to support reliable application behavior.
- Containerized and deployed the system on AWS with Docker, improving maintainability, performance, and cloud deployment readiness.

Full-Stack Asset Management System

2026

- Developed a full-stack web application to track assets, assignments, and inventory status across users and locations.
- Built responsive frontend interfaces with search, filtering, and dashboard views using modern web technologies connected to backend APIs.
- Implemented authentication, CRUD functionality, and role-based access to support secure and efficient record management.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, C, HTML, CSS, Golang

Frameworks & Tools: React, Node.js, Next.js, Spring Boot, Tailwind CSS, Docker, Git, GitHub, GitHub Actions, AWS, Azure, Postman, MySQL, MongoDB, Linux/Unix, Jira, Maven, Gradle, Pandas, Chart.js, Angular, Excel, Power BI, Replit, Figma

Concepts: REST APIs, API Integration, OOP, CI/CD, SDLC, Agile, Scrum, QA Testing, User Acceptance Testing, Unit Testing, Integration Testing, Version Control, Debugging, Data Structures, Authentication
